Kourepun Kouru

Theorem:
$$a_n - cxog$$
. $\Leftrightarrow a_n - cyyng$.

 $\forall E > 0 \exists N(E) \in M \quad \forall n, k > N(E) \quad |a_n - a_k| < E$

Dok: $\lim a_n = a$
 $\Rightarrow \forall E > 0 \quad \exists N_1(E) \in M \quad \forall n > N_1(E) \quad |a_n - a_k| < E$

① $\forall E > 0 \quad \exists N_1(E) \in M \quad \forall n > N_1(E) \quad |a_n - a_k| < E$
